Ez Signals Builder

Ez Signals Builder provides automation through a trading system enabled by Artificial Intelligence [AI]

Currently, EzTrade offers 3 trading systems:

- [Manage Own Money \(MOM\)](#)
- [Periods Of Profit \(POP\)](#)
- [Turtle System](#)

MOM and **POP** are proprietary systems based on the analysis of trend following indicators, such as Stochastic Oscillator, MACD, and PPO.

Turtle System is based on the rules taught by legendary trader Richard Dennis.

EZ Signals Builder is a platform that allows traders to build your own trading system based on various prebuilt sets of trading rules that are refined by proprietary statistical modeling and learning engine.

This approach provides traders the opportunity to select from a number of trading systems that can be customized to their needs. Traders can input parameters to personalize their trading system and immediately back test it.

ONCE THE PLATFORM AI RULES MEET OUR TRADER'S OBJECTIVE, IT CAN BE USED TO RECEIVE EXACT SIGNALS TO PLACE OR EXIT TRADES.
